# Steps to Help You Find a COVID Vaccination Appointment

At BAYADA, we believe our clients come first. Our mission is, and always has been, to help people have a safe home life with comfort, independence, and dignity.

During the COVID pandemic, one of our core safety strategies is the COVID vaccination. Finding an appointment to receive a COVID vaccination can feel complicated. Here are some tips that have helped others find their spot to get their shot. *(Please note, while BAYADA is doing all we can to find and communicate vaccine opportunities to our clients and employees, we cannot guarantee availability nor provide the vaccine at this time.)*
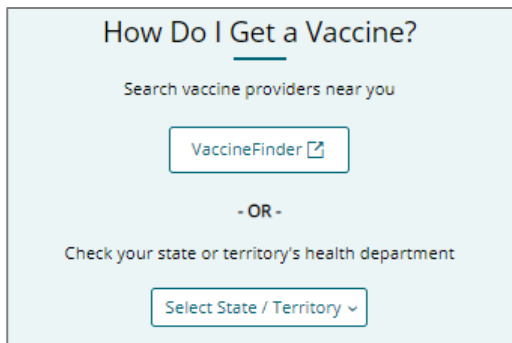

## Vaccine Finder

1. Visit vaccinefinder.org, a free search engine that helps identify available vaccine opportunities.

2. Click **Find COVID-19 Vaccines**.

3. Enter your zip code and the distance you can travel. You also can limit your search to specific vaccination brands.

## Vaccine by state

You can also search for vaccinations by state by visiting cdc.gov/coronavirus/2019-ncov/vaccines. This site will connect you directly to your state's Department of Health vaccination site.

## Vaccine by county

Another option is to search for the COVID vaccination by the county of your residence. Some counties are bringing the vaccine to the homes of homebound individuals.

## Local vaccine opportunities

Many have had success searching for the COVID vaccine locally. Call your primary care physician, hospital, pharmacy, and grocery store to ask if they are offering the COVID vaccination.

Please contact your office with any questions.
