

## Self-Service - Remove Security Question - Field

### Steps

1. Sign into your account at bayada.okta.com
2. Click on **your name** in the upper right corner of the screen.
3. Click **Settings**
4. To remove Security Question, under Security Methods, click **Remove**
5. Verify with your **Password** and Choose your verification method to receive code.
6. Once you enter the code, security question will no longer be available.

The screenshots illustrate the process of removing a security question from an Okta account:

- Top Left:** User profile for Alisha Karmachraya (alishakch175@gmail.com) with a menu showing Settings, Preferences, Recent Activity, and Sign out. A hand icon points to the Settings option.
- Top Middle:** 'Security Methods' section showing options to manage Password, Phone, and Security Question. The 'Security Question' row is highlighted with a red box, and its 'Remove' button is visible.
- Top Right:** Confirmation dialog 'Remove Security Question' asking 'Are you sure you want to remove Security Question enrollment?' with 'Yes' and 'No' buttons.
- Bottom Row:** Three verification screens:
  - Verify with your password:** Shows a password field and a 'Verify' button.
  - Get a verification email:** Shows an email icon and a 'Send me an email' button.
  - Verify with your phone:** Shows a phone icon, a code entry field, and a 'Verify' button.
- Bottom Right:** Another view of the 'Security Methods' section, showing the 'Remove' button for the Security Question method.
