

## Multi-factor Authentication (MFA) Screen Prompt (Okta Verify)

Please note, an internet-connected device is required to proceed with the next steps.

Enroll using Okta Verify as a security method. You'll receive a push notification or an in-app code to verify your identity.

### Steps

1. After signing into your account at <https://bayada.okta.com/>, you will occasionally be prompted to verify your identity via the method chosen during your account setup:
2. You can easily switch between **entering a code** or **receiving a push notification** from Okta Verify:
  - **Enter a code:** Open the Okta Verify app on your phone, enter the **code on the screen**, click **Verify**.  
*Note: the in-app code will change every thirty seconds.*
  - **Get a push:** Open the Okta Verify app on your phone and **click Yes, It's Me**  
*Note: if you ever receive a push notification and it is not you, click No, It's Not Me.*

### Best practices

1. When using Push verification, check the **Send Push Automatically** box.
